

Welcome to the
**Putnam Valley
Heating Oil Program**

Dear Putnam Valley Resident;

This brochure will introduce you to the Putnam Valley Heating Oil Program. This is a new initiative for the Town Board, intended to save you money on the increased cost of heating your home this winter. This is a totally voluntary program, in which all home owners may join the oil plan and pay a one-time fee of \$5.00 to become a member.

Members will be able to purchase oil at a discount, through our co-op program. The cost will be no more than 40 cents per gallon above the wholesale cost of our local distributors and an average of approximately 20 cents per gallon less than the homeowner can obtain. The price will fluctuate with the market but should be better than the current retail price.

You choose among any of the participating companies and change distributors by simply calling another company. This program has two additional advantages. First, some companies may offer discounts on their annual heating maintenance service contracts to our members. Second, energy audits, designed to enable you to consume less oil and save you even more money, may be available as well.

The details of this plan, available to all residential homeowners in the town of Putnam Valley are provided below and should answer almost all of your questions.

We invite you to join this exciting plan. Your Town government is committed to helping you save money – and helping you stay warm.
