

Recycling of Electronics

We all know the importance of recycling and most of us recycle plastic, glass and paper weekly through our local garbage pick-up. Many people in town also take advantage of the "bulk drop off" our town has a few times a year.

Besides these services one could also previously dispose of electronics in our county. Unfortunately Putnam county is no longer offering recycling of electronics. That said, residents of Putnam Valley can still be environmentally conscious when disposing of their electronics.

Best Buy in Cortlandt Town Center will accept 3 electronic pieces of equipment at any time and most items, free of charge. TV screens and monitors can also be disposed of at the same location, for a fee of \$ 25, but they must be 50 inches or smaller for Best Buy to take them.

Until Putnam County will be able to accept electronics again this is a good option. For further information about Best Buys recycling program please go to Best Buy's Website
